## Practical 9 - MHP Analysis - Hindi vs English Input Test

Aim:

To analyze typing performance for Hindi vs. English using MHP framework.

Objectives:

1. Prepare text in Hindi and English.
2. Recruit users to type both.
3. Break tasks into MHP stages.
4. Measure time and errors.
5. Compare results.
6. Suggest improvements.

Tools / Software Required:

- Google Input Tools / Inscript Keyboard
- Stopwatch
- Spreadsheet

Procedure:

1. Have participants type both texts.
2. Time each task and count errors.
3. Break into MHP stages.
4. Compare performance.

Submission Format:

- Data table.
- MHP stage breakdown.
- Comparison chart.
